Q: Excel VBA - Add (1) + dia1 to the date to show up in the formula range? How do I make this + any number to be interpreted as "day 1"? Current formula is =TEXT(F3,"mmmm") I'd like it to say "=TEXT(F3,"mmmm") + 1 A: Here's how: Sub test() Dim i As Long i = 1 Worksheets(1).Cells(1, 1) = "=TEXT(F" & i & ", " & "mmmm")" i = i + 1 Worksheets(1).Cells(2, 1) = "=TEXT(F" & i & ", " & "mmmm") + 1" End Sub The + is interpreted as plus operator in formulas.

A: I use Pinax in my product. It's easy to create your own images, and comes with a lot of features.

Q: MongoDB: maintaining unique id when altering collection I'm using MongoDB embedded in an existing application and recently I noticed that unique ids are being lost when modifications are performed to the collection. When doing, for example, count for the collection, the schema change is generated, the current unique id is overwritten with a new unique id and the collection is considered (and updated) as two different schemas. Why does this happen? What would be the best solution to solve this?

A: Since MongoDB 2.6, you can use versioning collections to maintain a unique identifier for a document even if the schema changes: db.collection.ensureIndex({name:1}, {version: true, dropDups: true}) You can also use the new \$setModifiedAt and \$setDateCreated fields to maintain unique identifiers in documents:

```
db.things.insert( { name: "MyNewThing" } )
db.things.find({}) { "_id" : ObjectId("4dc3dda4dac11fc1786e80f9"), "name" : "MyNewThing" }
db.things.find({_id:ObjectId("4dc3dda4dac11fc1786e80f9")}) { "_id" : ObjectId("4dc3dda4dac11fc1786e80f9"), "name" : "MyNewThing", "_setModifiedAt" : ISODate("2017-05-05T21:30:11.493Z"), "_setDateCreated" : ISODate("2017-05-05T21:30 3a67dffeec
```

E-Counter Crack

- An attractive countdown timer with lots of possibilities to customize it. - A password-protected application that runs smoothly on all Windows versions. - A fast system performance, never hampering PC performance. - Great skin support. - Plenty of options to play with, but also a few annoying bugs like the shutdown option that might hinder the application. Free Download: e-Counter is a native Windows application, which means that you can download it from the official website and use it without spending anything. e-Counter seems to be a very handy software, offering up a great counting timer for free. If you want to test the other features, the full version is available for purchase, for around \$9.99. You might be missing the shutdown option though, an annoying little detail that could easily be resolved, but overall, e-Counter is another valid counter for your PC.

What's New in the?

e-Counter is a digital counter that comes with support for plenty of actions that can be performed when the time ends, including computer shutdowns and program launching. It's almost impossible to get lost in the main window of the program, as everything's very simple and the whole design is focused on the counter per se. In fact, you're not even allowed to do many things in this screen beside adjusting the countdown timer and the size of the font. For more configuration options however, you need to go over to the settings menu where you shall discover a whole new and a bit less user-friendly world. First of all, users are required to pick an action to be performed when the time ends, so you can play a sound, shut down the system, launch a program, display a text message, hibernate the PC, disconnect the Internet connection, lock workstations or play a Flash file. Most of these options come with their very own settings, but also with a preview panel at the top of the window to see the way the selected effect is supposed to look. A password-protection system is also available, thus blocking other users from accessing the application and pausing the counter. Configuration profiles can be saved and automatically launched at a later time. e-Counter doesn't hamper system performance and it works smoothly on all Windows versions, without requiring administrator privileges on Windows 7 workstations. The only problem we've discovered during our test however concerns the shutdown feature, which may be blocked by the running processes, so a dedicated option that could force all apps to close could help a lot. Overall, e-Counter is more than a decent software solution, offering not only an appealing look, but also plenty of settings to play with. Skin support is also available, so you can freely customize the look of the program. Summary: E-
