Obstructive sleep apnea (OSA) is a medical condition characterized by repeated partial or complete upper airway obstruction during sleep. OSA is characterized by snoring and hypoxemia during sleep and by a significant reduction of the arterial oxygen tension (PaO₂) compared with the oxygen saturation (SpO₂). The symptoms of OSA occur during sleep and therefore impair an individual's quality of life, work, and daytime functioning. In children, OSA manifests with nocturnal respiratory disturbances and sleep disordered breathing such as snoring, apneas and hypopneas. OSA is highly prevalent in childhood and is more common in the obese child. The negative impact of OSA on physical, behavioral, and emotional functioning in children is well documented. e79caf774b
